

6516207941.txt

I am writing due to my concern about NAB's petition 04-160. I feel I should be able to get weather and traffic on the XM radio service as well as my local radio. I feel that XM subscribers like myself should have rights to listen to whatever we choose however we choose as this service is paid for just like satellite t.v. or cable. I choose to pay for XM because I can listen to new and different types of entertainment without all the talk and commercials.
Thanks for listening,

a concerned voter
